20 Most Promising Digital Transformation Solution Providers - 2019

Innovative technologies such as Mobile, Cloud computing, Internet of Things (IoT) and Artificial Intelligence (AI) have revolutionized the industry. Owing to the rapid penetration of aforementioned technologies, India's digital transformation market generated revenue of \$24.5 billion last year, and it is projected to advance at a CAGR of 74.7 per cent during the forecast period of 2019–2024), according to Pre-scient and Strategic (P&S) Intelligence. With overall growth in the information and communication technology (ICT) sector, the country is also expected to increase the rate of digital transformation in the coming years with CIOs looking to make the best use of it, so as to increase productivity, enhance efficiency and improve customer experience. By region, North, South, East, and West are the categories of the digital transformation market in India. Out of which, South India is predicted to be the largest as well as fastest-growing market, registering a CAGR of more than 75.0 per cent during the forecast period. Enabling enterprises to choose the right partner to work with, CIOReviewIndia proffers a list of "20 Most Promising Digital Transformation Solution Providers". This compact list displays an inventory of skilled vendors with an industry rich experience, technically adept teams and a proven track record. A panel consisting of prominent CEOs, CIOs, industry analysts and CIOReviewIndia editorial team has meticulously researched and locked down on the final 20 vendors who we firmly believe can aid in bringing about true digital transformation of organizations.
